

SELF-LOCKING STAINLESS STEEL CABLE TIES provides a strong, durable method of bundling and fastening. The ties are designed for use in application where strength, vibration, weathering, corrosion extremes are a factor. The low weight, high strength of the ties makes them more efficient and reliable than conventional fasteners. The single wrap, Self-locking low weight design provides improved efficiency and reliability.

The self-locking Ball Lock design provide quick and easy installation. Their high strength, non-flammability, fully rounded edges and easy ball lock tie design provide the ultimate support for bundling and securing cables, virtually any indoor, outdoor and under ground applications. Used in: Automotive, Air craft, Truck / Car engines, Telecommunications, Traffic Signals, Aerial Support, Telephone cables, Electric cables, Communication Towers, Ship Building, Offshore, among others.
