ABOUT **XIAOXIAN RUIYI COMMERCIAL TRADE**

We Xiaoxian Ruiyi Commercial Trade Co., Ltd. is a leading aluminum metal processing service center and exporter specializing in aluminum alloy sheets (aluminum plates), Aluminum Alloy Tread Plate/sheet roll With Mill /mirror Finish, anodized, embossed, tread sheet, diamond aluminum sheet, Perforated aluminum sheet, The aluminum sheet / plate can be used in the production of aircraft, automobile, train, building wall, ceilings, roofing, aluminum reefer containers and special containers, etc.

Vision

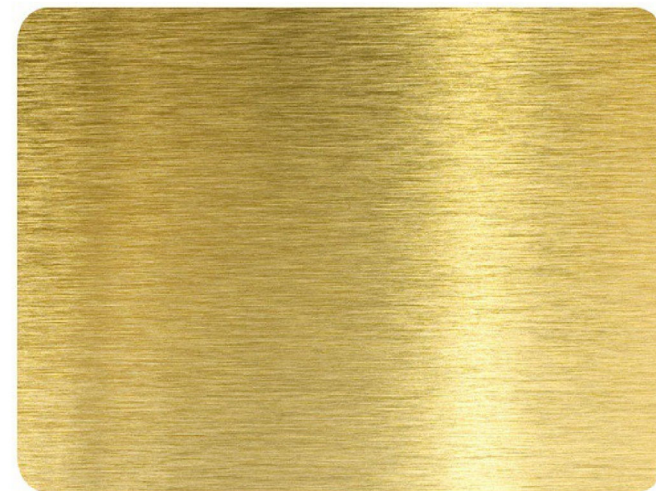

To be best One-Stop Solution to Aluminum Metal Supply in China.

Mission

We commit to provide world class Aluminum products. Nothing is more important to us than your complete satisfaction in our service and product with exceptional quality, continuous growth, opportunities, and mutually beneficial relationships.

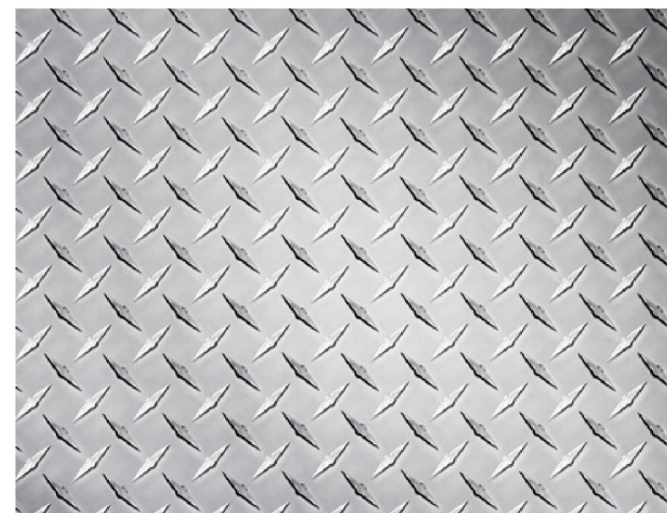

ANODIZED ALUMINUM SHEET

Anodized aluminum sheet is to place the aluminum sheet in corresponding electrolyte (such as sulfuric acid, chromic acid, oxalic acid, etc.) as the anode for electrolysis under specific conditions with externally applied current. anodized aluminum sheet suitable for manufacturing engine cylinder or other wear-resistant parts

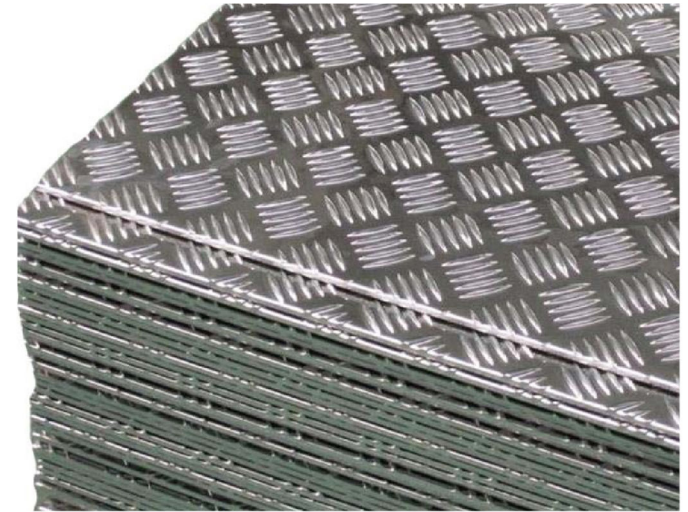

ALUMINUM DIAMOND PLATE SHEET

We mostly supply variety of aluminum tread plate in both 3003 and 6061 alloys. Commonly referred to as "Diamond aluminum tread plate" due to its raised diamond-shaped pattern, And tread aluminum plate exhibits strength, durability, ease of welding, corrosion resistance and skid resistance. Aluminum Tread plate is available in 3003 with the typical H22/24 temper where welding is readily accomplished. For the highest strength applications, Tread plate is in 6061, frequently heat treated and aged to T6 temper.

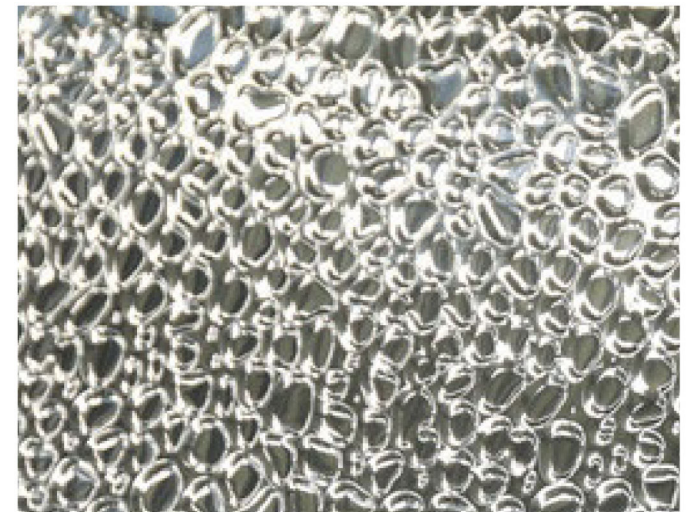

ALUMINUM CHECKERED PLATE TREAD

Checkered plates/tread aluminum sheet with distinct design and highly slip resistance can be easily configured into a variety of designs and patterns as per the client's requirement. Aluminum checkered plates can be supplied in different forms of finished products including diamond plates, aluminum checkered plates, tread plates and stair tread. Aluminum checkered/tread plate is a product where quality and functionality meet beauty.

STUCCO EMBOSSED ALUMINUM SHEET

A stucco embossed finish is designed to have superior durability, reduce glare and reflectivity, and also to give aluminum a decorative finish. It is also a finish that can stand up to the elements without dulling or other signs of wear or tear. It is widely used in refrigerator, freezer, interior decoration, roofing, ceiling, wall decoration, household appliances and other fields. The products have all kinds of thickness, width and specification, which can sufficiently meet the user's demand. Used for Insulation works, fridge freezer, cold storage, roofing panels, floor, building, electric, wall, machine and so on. Stucco embossed aluminum sheets are a thin (.024") aluminum sheet with a wide variety of uses and applications. The embossing process reduces the light reflectivity of the metal.
