

Overview

Quick Details

Place of Origin: Zhejiang, China (Mainland)

Brand Name: Ehas-Flex

Model Number: EH-504 -01

Type: Union

Material: Stainless Steel, SUS304/316/321

Technics: Welding

Connection: Female*Male

Shape: Equal

Head Code: Round

Nominal Dia: DN10-DN80

Length: 150mm-2000mm

Ends: Female Union * Male Threaded

Rated Working Pressure: 10bar, 16bar, 25bar, 40bar

Thread Standard: BSPT, NPT

Certificate: ISO

Application: Gas, Petro, Water, Hot Water, Steam, Chemical....

OEM/ODM: Allowed

Max. Working Pressure: 300°C

Supply Ability

Supply Ability:70000 Piece/Pieces per Month HS Code: 8307 10

Packaging & Delivery

Packaging Details

Cartons or Pallet or Plywood Case

No Unacceptable Material Used for Packing

Port

Shanghai or Ningbo or Any Port in China

Lead Time :

Quantity(Pieces)	1 - 2000	>2000
Est. Time(day)	25	To be negotiated

Product Description

Braided Flexible 304SS Corrugated Hose

100% Tested Before Delivery

More than 40-year experience in manufacturing

Material:

Bellows: Stainless Steel SUS304/316/321

Braids: Stainless Steel SUS304

Ends: Stainless Steel SUS304/316/321

Features

Braided Joints are an alternative to hinged joints, gimbal joints, lateral joints. In many cases particularly with smaller diameters they are cheaper and better method of obtaining the same effect.

Tube Type:

Tube Name	Features	Diameter
Annular Tube	A bellows effect is realized by long flexible tube super pressure resistance and durability are achieved through a low-profile, multi-convolution shape.	1/4~2
Spiral tube	General-purpose tube developed through a high-speed, multi-convolution, deep-drawn molding process, with high durability due to superior spiraling elasticity.	1/4~ 2-1/2
Omega tube	General-purpose tube designed for a broad range of applications. produced through the revolutionary omega molding process that minimizes material stress	1~24
Ultra-soft	Ultra-flexible tube is made of thin, fine materials for superior durability.	1/4~2
Ufo	High-quality, multi-ply tube	1/4~2
2ply-OMEGA	Tuf Omega tube is double-layered to greatly improve pressure and impulse resistance	1-1/2~16

Braid Type:

1. Wire Braid

According to pipe diameter and pressure rating, select wire gauge, strand number and pack number to braid the products.

Low cost, perfect flexibility and wide application, but low pressure resistance and low tensile strength.

2. Braided Braid

The same design as wire braid, but it should braid each rope according to strand number and then braid them together.

Excellent pressure resistance, wear resistance and tensile strength.

3. Plate Braid

Cut sheet into belt and braid it by hand.

Large diameter belt braid is available but is low flexibility. Is of pressure resistance but it is not easy in installation and prone to break due to its low tensile strength.

Production Process

Production Capacity

Flexible Sprinkler Hoses: 350,000pcs per Month

Flexible Joints/ Expansion Joints: 80,000pcs Annual

Gas Connector: 300,000pcs Per Month

Water Connectors: 5,000,000m Annual

Tube Making

Wire Braiding

Welding

Excellent Welding

EH-504 Metal Flexible Tube

EH-504 Metal Flexible Tube

Testing

100% Before Delivery

Raw Material Inspection

Bellows Shaping Inspection

Leakage Test

Packaging & Shipping

Carton Box, Pallet, or Plywood Case

No Unacceptable Packaging Material or Bamboo Products been Used as Packing

Pack by Foam Sheet

Type1: Carton Box with Pallet

Type 2: Plywood Case

Company Information

Certifications

CHASE-FLEX

FM Approved: Flexible Joint, Expansion Joint, Flexible Sprinkler Hose

UL Listed: Flexible Sprinkler Hose

CSA Certified: Gas Connector

CCC Certified Flexible Sprinkler Hose

Our Customer

ECHASE-FLEX

Company Overview

ECHASE-FLEX

Ehase-Flex company located in Hangzhou, near Shanghai and Ningbo port, with more than 40 year experience, is one of the most famous brand in metal flexible joint and expansion joint in Taiwan. We are specialized in manufacturing flexible joint, expansion joint, flexible sprinkler hose, flexible tube, gas connector, rubber joint. Our company had obtained the quality control system I S O 9 0 0 1. Our products are F M, C C C, C S A, S G S approved and 1 0 0 % tested before delivery.....

THE INTERSEC Dubai

- High producing capacity with timely delivery. Normally, less than 25 working days.
- Professional researching, developing team and equipments, can design and manufacture as customers' requirements.
- After-Sales promise is respond within 4 hours and reach the site within 48 hours for domestic user, respond within 6 hours for overseas user.

FAQ

Q : Are you trading company or manufacturer?

A: We are **manufacturer of** expansion joint, flexible joint, flexible sprinkler hose, flexible tube, corrugated gas connector, spring absorber with more than **40-year experience**.

Q: Do you have products catalog?

A: Yes, we have. Please tell me your email or instant messenger, we will send our catalog.

Q: Can you provide drawings and technical data?

A: Yes, our professional technical department will design and provide drawings and technical data.

Q: Do you provide samples? Is it free or charged?

A: Yes, we can offer sample free but shipping charges covered by customer.

Q: Have your products been exported?

A: Yes, they have been exported to USA, France, Australia, Peru, Chile, Brazil, Uruguay, Russia, UAE, Saudi Arabia, Oman, Egypt, Kenya, Serbia, Vietnam, South Korea, Indonesia, India, Thailand, Pakistan, Philippines, Singapore, HK...

Q: How long is your delivery time?

A: Depends on QTY, but normally no more than 20 working days.

Q: Can the products be manufactured by customer's requirement?

A: Yes, the specifications stated above are the standard ones, we can design and manufacture as requirement.

Q: Visting company is allowed or not?

A: Yes, we welcome customers visiting our company. We are located in Hangzhou, Zhejiang Prov., China
