

# FIRST ALUMINUM @ 52

First Aluminum Nigeria PLC, with registration number RC 2288, is one of the First Nigerian companies. FAN started with the production of Aluminum sheets and has introduced Aluminum roofing in Nigeria and set the standards for it.

In 1960, the remelt and rolling mills operations started in Port Harcourt. In 1991, it was named First Aluminum Nigeria PLC and became quoted on the Nigeria Stock Exchange in 1992.

The minimum norm in Nigeria, set by the Standards Organization of Nigeria (SON), for roofing sheets is 0.40mm. First Aluminum will not supply roofing sheets below this norm. First Aluminum does not compromise on quality. Because of this, we use superior 'Stucco' embossing method for our sheets. Embossing is the mechanical deformation of the surface of the sheet to give it the needed mechanical properties, such as strength.

First Aluminum can guarantee the quality of product from alloy composition to the installation of the roof. FAN is still one of the market leaders in Aluminum sheets in Nigeria and also supplies roofing sheets and executes roofing projects. We are one of the few vertically integrated aluminum companies; thereby we can guarantee the highest quality available in the Nigeria market.

FAN is also one of the main players in Nigeria in the production and distribution of packaging tubes for healthcare and cosmetics Industry. Our goal is to serve our customers with the highest quality products that add value to them and surpasses their expectations.
